1

1-Click on AppStore

2-Lookup Smarters Player Lite, install and open the application

LICENSE AGREEMENT

YOU HEREBY AGREE TO TERMS HERE OTHERWISE DO NOT USE THE APP.

IPTV Smarters is an advanced player that uses M3U and JSON user-created playlists.

We do not provide any actual playlists or contents.

This application is designed to use with the user's own or created playlist with legal contents.

You are responsible to check your created playlists/contents are legal and you have

ACCEPT

3-Accept the license agreement

SMARTERS PLAYER
Lite

PLAY A SINGLE STREAM >

LOAD YOUR DATA FROM DEVICE >

ADD YOUR PLAYLIST(via XC API) >

By using this application, you agree to the Terms of Services.
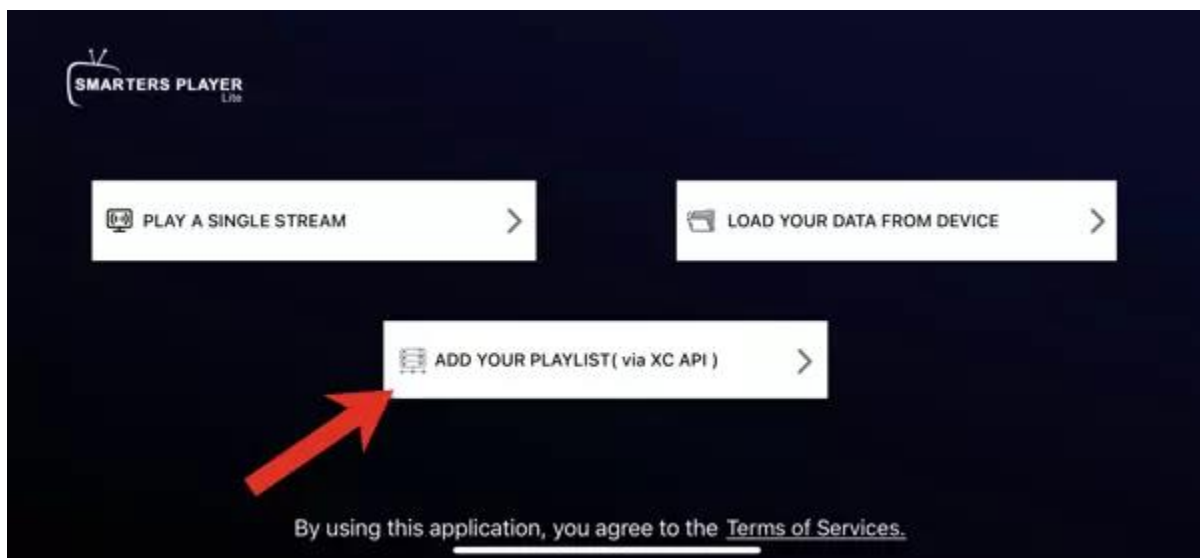

4-The easiest way is to go with XC API

5-Most of you are familiar with Xtream Codes API login page, it's basically adding details from M3U url into proper fields.

Server URL:

Imagine the M3U url you have is this:

http://saypopular.com:25461

If you closely look at the url above, you will see some values like the server address, username and password.

Now the above url breaks into the following details if we want to put it into the login page above

Playlist Name: Name it anything you like

**Username:** according to the above url it should be user1

Password: according to the above url it should be pass1

Server address: according to the above url it should be

http://saypopular.com:25461

6-With correct details, the app will start pulling data from the service.

7-Playlist is fetched and ready. Click on it.

8-Set a parental ping if you want.

9-From now on, every time you open the app, this should be the dashboard. Select the section you want to watch the content of and enjoy!
